

BURCO[®] APR-40

Nonionic Surfactant

BENEFITS AND FEATURES

- Effective replacement for alkyl phenol ethoxylates in industrial formulations
- Excellent emulsifier for solvents, oils and greases
- Cold water soluble, no-gelling at any concentrations
- Alkyl phenol ethoxylate (APE) free
- Produced from readily biodegradable components
- Listed on the EPA's Cleangredients[®] database

TYPICAL APPLICATIONS

- Industrial lubricants
- Water rinseable solvent cleaners
- Heavy duty industrial cleaners

TYPICAL PROPERTIES

| | |
|--|--------------|
| Appearance at 40°C | Clear liquid |
| pH (1% aqueous) | 6.5 |
| Activity, % | 99 |
| Cloud Point, 10% in 25% butoxydiglycol, °C | 57 |
| Viscosity, cP at 25°C | 100 |
| Density, lbs/gallon | 7.7 |

FORMULATION GUIDELINES

- Burco APR-40 is compatible with cationic, anionic, and nonionic surfactants.
- Replace water dispersible alkyl phenol ethoxylates (NP-4) with an equal amount of Burco APR-40. In some cases, lower levels of Burco APR-40 will give comparable performance.

AVAILABILITY

Burco APR-40 is available in 53-gallon, open-head, poly drums (410 lbs), in totes, and in bulk.
