

## **BURCO® DSA-9C**

### **Durable Sheeting Rinse Additive**

#### **BENEFITS AND FEATURES**

- Provides a durable hydrophilic surface that sheets the water off for a quick drying, spot free finish when used as a final vehicle rinse additive
- Excellent on painted surfaces, glass and metallic finishes
- Continues to sheet off water after several rinse/dry cycles
- Effective at low use levels; typical application concentration is 0.7%
- Non-corrosive
- Can be incorporated into touchless and bucket car wash products
- Alkyl phenol ethoxylate (APE) free
- Contains no VOC's.

#### **TYPICAL APPLICATIONS**

- Vehicle rinse aids
- Rinse additives for other hard surfaces

## TYPICAL PROPERTIES

|                     |                         |
|---------------------|-------------------------|
| Appearance at 25°C  | Clear, colorless liquid |
| Ionic Nature        | Cationic                |
| pH (1% aqueous)     | 10.7                    |
| Density, lbs/gallon | 8.34                    |

## AVAILABILITY

Burco DSA-9C is available in 53-gallon, open-head, poly drums (430 lbs), in totes, and in bulk.
