

BURCOMIDE™ TDA-160

Fatty Diethanolamide

Burcomide TDA-160 is a long chain diethanolamide that is used to prepare invert emulsions. It can also be used to add viscosity to aqueous cleaners and detergents.

TYPICAL PROPERTIES

Appearance	Amber Liquid
Density, lbs/gal	8.0
Color, Gardner	10 Maximum
Acid Value	10 Maximum
Amine Value	50-70
Activity, %	99 Minimum

TYPICAL APPLICATIONS

- Used to prepare invert emulsions in petroleum processing, polymer production and wax/polish formulations.
- Wetting and penetrating properties lend themselves to use in formulating penetrating oils and specialty lubricants.
