

# BURCOFAC™ 1060

Free Acid of Organic Phosphate Ester (Anionic)

## BENEFITS AND FEATURES

- Provides excellent wetting, detergency, and emulsification
- Serves as hydrotrope for other surfactants, glycol ethers, hydrocarbons, and oils
- Soluble in water and aliphatic solvents
- Exceptional alkaline and electrolyte stability
- Does not gel at any concentration in water
- Provides moderate foam
- Alkyl phenol ethoxylate (APE) free

## TYPICAL APPLICATIONS

- Hard surface cleaners
- Laundry and dishwashing detergents
- Emulsion polymerization
- Floor cleaners and wax strippers
- Car and truck wash detergents
- Agricultural chemical emulsifiers

## TYPICAL PROPERTIES

Appearance at 25°C	Clear liquid
pH (1% aqueous)	2.0
Activity, %	100
Viscosity, cP at 25°C	400
Density, lbs/gallon	8.92
Phosphorous Content, %	5.5

## FORMULATION GUIDELINES

- Burcofac 1060 is compatible with anionic and nonionic surfactants.
- Burcofac 1060 does not gel at any concentration in water.
- Burcofac 1060 is soluble and stable in up to 15% active sodium hydroxide.
- To increase the amount of foam generated, surfactants such as Burcoterge C2P-39 (amphoteric) or Burco COPB-35 (betaine) can be added to the formulation.

## AVAILABILITY

Burcofac 1060 is available in 53-gallon, open head poly drums (480 lbs), in totes, and in bulk.
