

# BURCO® ECO-2450

## Nonionic Alkyl Polyglycoside Surfactant

### BENEFITS AND FEATURES

- Excellent emulsification of oily soils
- Compatible with acids, alkali and other builders
- Adds foaming, wetting and dispersant properties
- No cloud point
- Exhibits excellent surface tension reduction
- More soluble and stable than traditional nonionics under a wide range of conditions
- Unlike alcohol ethoxylates, readily dissolves in caustic solutions; stable in solutions containing up to 50% caustic soda or potash
- Reduces need for hydrotropes and foam builders
- Alkyl phenol ethoxylate (APE) free
- Readily biodegradable
- Can be used in the formulation of “green” products compliant with Green Seal and EPA Design for the Environment (DfE) standards and similar “green” standards

### TYPICAL APPLICATIONS

- Hard surface cleaners
- Food and beverage cleaners – bottle washing, brewery cleaning, juice pulp removal
- Laundry and dishwashing detergents
- Circuit board and associated electronics cleaners

## TYPICAL PROPERTIES

Appearance at 25°C	Viscous yellow liquid
pH	12
Activity, %	50
Viscosity, cP at 25°C	2500
Density, lbs/gal	9.32
Flash Point, °F (CC)	>200

## FORMULATION GUIDELINES

- Burco ECO-2450 is compatible with cationic, anionic, and nonionic surfactants.
- Burco ECO-2450 can be used in both acidic and basic environments. The product is stable in solutions containing up to 50% caustic soda or potash. To avoid gel formation with caustic, premix ECO-2450 with an equal amount of water and other components before adding caustic.
- Use of solvents such as glycols, glycol ethers, and d-limonene in the formulation is possible.
- To increase the amount of foam generated, surfactants such as Burcoterge C2P-39 (amphoteric) or Burco COPB-35 (betaine) can be added to the formulation provided that they are soluble in the builder system being used.
- Formulation of DfE and Green Seal acceptable products should follow the guidelines published by the certifying bodies to ensure all standards are met for all materials in a given formulation.

## AVAILABILITY

Burco ECO-2450 is available in 441 lb. drums (net).
