

BURCO® RP- 8888

Water Displacing Rust Preventive, Lubricant, and Penetrant Concentrate

Burco RP-8888 is oil soluble and solvent extendable concentrate designed for use in formulating oil / solvent based rust preventive, lubricant, and penetrant. The product is a well-balanced blend of corrosion inhibitors, lubricant additives, and penetrating additives. Suggested applications include household and industrial penetrants, lubricants, and corrosion preventives. **RP-8888** may be diluted at 10% w/w, or higher, in solvents such as 140° F flash point (TCC) heavy aliphatic petroleum naphtha or other higher flash point solvents with or without additional petroleum oil. Higher boiling point / flash point solvents may be used to meet any necessary VOC restrictions or requirements

Burco RP-8888 exhibits the following properties in solvent or oil / solvent formulations:

- forms a ***protective, non-staining, oily film*** for short term, indoor and outdoor, ***rust protection***
- leaves a ***thin oily film*** providing excellent protection on ***all metal surfaces***
- exhibits excellent ***moisture displacing*** properties to rust preventive formulations made in low viscosity oil or solvent as a base
- is oil and solvent soluble and can easily be blended into neat oil or solvent formulations
- provides good ***boundary lubrication***
- has a very ***mild odor***
- films containing **Burco RP-8888** are easily removed with an alkaline cleaner or by solvent degreasing
